# What is Redux ?

**State Management Library**

Open-source JavaScript library

**Makes complex Application Easier**

Provide consistent data across application

**Easily Debuggable**

Redux Devtools to trace when,where,why and how about application state

**Provides Centralized Store**

Component direct access the data

**It's Flexible**

Works with any UI framework/libraries

**Difficulty Level decreases with time**

New terms Actions, Reducers, dispatch will make you feel lost and confused
